Course Vision

Given the increase in India’s demographic diversity, especially in educational institutions, it is critical for an Education Programme to include an understanding of diversity and marginalization within the classroom and recognize the need to develop sensitivity towards this aspect. However, classrooms today are ill equipped to handle this need. Classroom teaching and practice operate with an assumption of homogeneity. The teacher maintains what she considers the ‘norm’. Students are encouraged to be part of the ‘mainstream’. Any deviance from the norm is disregarded and even scoffed at. Many children thus have a traumatic relationship with schooling. Schools construct their learning environments without recognizing the complexities of the lives of children, the socio cultural backgrounds from which they come and very often negate their ways of knowing, leading thereby to their marginalization. This course, thus, aims at highlighting the need to understand diversity and develop an understanding/ sensitivity and appreciation of difference. There is an attempt to view schooling and education from the perspective of marginalized groups. It will help in building an understanding which will equip them to work effectively with students from diverse background including cultural, religious minorities, linguistic and different socio-economic groups.

This Course can also include a practical component.
